SB 350 Low-Income Barriers Study

- Identified barriers low-income residents must overcome to increase access to clean transportation options
- Today’s focus areas
  - Expand transportation assessments to better understand localized community needs
  - Increase education and awareness of clean transportation and mobility options
  - Expand funding for clean transportation and mobility projects
  - Develop a one-stop-shop to streamline access to clean transportation options
Clean Transportation Equity Project Priorities

• Increase access to clean transportation and mobility options for priority populations
• Reduce GHG emissions and improve public health through cleaner air and reduced exposure to pollution
• Support SB 350 and other policy, statutory, and regulatory goals and requirements
Clean Transportation Equity Projects

- Clean Cars 4 All
- Financing Assistance
- CVRP Low-Income
- Rural School Bus Pilot
- One-Stop-Shop Pilot
- Clean Mobility Projects
- Clean Mobility in Schools
- Community Solutions

Clean Mobility Projects
- Car Ownership Projects
- Outreach
- New Project
Implementation Challenges and Successes

- Projects take **time** to create, develop, and test prior to launch
  - Grant administration – solicitation to grant execution
  - Infrastructure siting, vehicle availability, and insurance
  - Respond to new and changing situations
  - Establishing partners and leveraging funding
- Making positive impacts on residents and communities
THANK YOU!
